Smart Campus Event Management System

SDG: SDG 4 – Quality Education

Presented By:

SAMADHI NAVYA – VTU30611 – 23UECS2083.

Courses Handling Faculty:

Dr. Hafizur Rahman

INTRODUCTION

1

- -The **Smart Campus Event Management System** is designed to manage campus events and student registrations through a centralized digital platform.
- It reduces manual work and minimizes errors in handling event-related data.
- Students can easily view available events and register online without any hassle.
- Event organizers can efficiently create, update, and manage events in real time.
- The system improves communication between students and organizers.
- It provides a complete solution for event planning, registration, and participation tracking.
- Overall, it ensures a smooth, fast, and user-friendly campus event management process.

PROBLEM STATEMENT

1

2

3

4

5

6

7

8

9

- Many colleges still use manual methods or multiple systems for event management.
- This leads to data inconsistency, errors, and delays.
- Students face difficulty in accessing correct event information and registering on time.
- Event organizers struggle to manage large numbers of participants.
- Manual tracking increases workload and chances of mistakes.
- Lack of a centralized system causes poor coordination.
- There is a need for an automated, efficient, and reliable system.

OBJECTIVE(S)

1

- To develop a **Smart Campus Event Management System** for efficient handling of events and registrations.

2

- To provide a centralized platform for managing students, events, and data.
- To reduce manual work and improve system accuracy.

3

- To make event registration simple, fast, and user-friendly.
- To improve communication and accessibility for users.

4

5

6

7

8

9

PROPOSED SYSTEM

1

- The proposed system is a **web-based application** developed using modern technologies.

2

- It allows students to register, login, and enroll in events easily.

3

- Organizers can create, update, and manage event details efficiently.

4

- Admin can monitor all activities and manage users.

- The system reduces paperwork and improves efficiency.

- It ensures real-time updates and better user experience.

- Overall, it provides a reliable and scalable solution.

5

6

7

8

9

PROPOSED SYSTEM ARCHITECTURE

- The system is a web application with a frontend (user interface) and backend (processing system), supporting two user roles: Administrators and Students.
- Students can log in, view events, register, and reset passwords, while administrators can manage events and monitor registrations, with automated email notifications for users.

WORKFLOW

TECHNOLOGIES USED

1. Frontend:

The Frontend those are used are:

- HTML
- CSS
- JavaScript
- Bootstrap

2. Backend:

The Backend those are used in these are:

- Java
- Spring Boot

3. Database:

- MySQL

4. Tools:

- Eclipse IDE
- VS Code
- Postman

5. Other Technologies:

- REST API
- JSON

MODULE DESCRIPTION

1

Module 1: User Management

2

Handles user operations in the Smart Campus Event Management System:

3

- * User registration (students, faculty, organizers, admins)

4

- * Secure login and authentication

5

- * Role-based access control

6

- * Profile management

Ensures secure access and proper user role management.

7

Module 2: Core Processing

8

Manages event-related operations:

Create, update, or cancel events

9

Event details: title, description, date, time, venue, participant limit

Users can view and search events

Ensures efficient event planning and scheduling within the campus. Manages data storage, retrieval, and ensures data integrity.

MODULE DESCRIPTION

Module 3: Registration and Participation Management

Handles event registration and participants:

- * Users can register for events
- * Stores participant details securely
- * Organizers can view and manage registrations
- * Tracks status (Registered, Approved, Cancelled, Attended)

Ensures smooth coordination between organizers and participants.

CULTURAL

Cultural Fest 'Aura'

Annual cultural festival with dance, music, and drama performances.

Registered Students (1)

Name	Email	Department	Status
Samadhi Navya	Vtu30611@veltech.edu.in	cse	REGISTERED

Event Details

2026-05-19

16:00:00 - 22:00:00

Open Air Theatre

999 / 1000 seats available

1

ADVANTAGES:

- Centralized system
- Saves time
- Easy event management
- Real-time updates
- Reduces paperwork
- Improves accuracy
- User-friendly interface

2

3

4

5

6

LIMITATIONS:

- Requires internet connection
- Security risks if not properly handled
- Limited features in basic version
- Needs regular maintenance
- Scalability issues for large systems
- Users need basic technical knowledge

7
